It's rare that you come across standout talent like him, truly an amazing "Therapist". I was fortunate to have been trained in Conversational Hypnotherapy by Anthony in 2017. I was particularly impressed by his ability to handle even the toughest clients—effortlessly. That skill often takes years to develop among remarkable professionals of hypnotherapy and also to translate that same skill set on to his students. Anthony Augustine is the best Hypnotherapist, Trainer and Coach upholding highest standards of ethical values and that comes with my heartfelt recommendation.

I can highly recommend a session with Anthony. He managed to resolve issues that years of counselling did not resolve within ONE session.

After working in the same team as Tony for a number of years, I highly recommend him as a practitioner. I consistently received positive feedback from his clients, about their breakthroughs and the self development they gained from his sessions. He has always been a friendly, caring and wise soul, with a knack for helping people gain insight into themselves.
